

Body Bags and Shroud Packs

Designed to simplify handling and minimize exposure

- All bags comply with OSHA Universal Precautions regarding containment of body fluids and protection from bloodborne pathogens
- Nontoxic PEVA bags available to comply with EPA chlorine burn requirements
- All of our bags are made from strong 7 or 8 mil material – twice as thick as many other bags on the market
- All designs are leak resistant, most with heat sealed exterior seams
- Five different sizes offered, ranging from Infant to Bariatric (which handles up to 550 pounds)

Curved "C" Zipper Bag

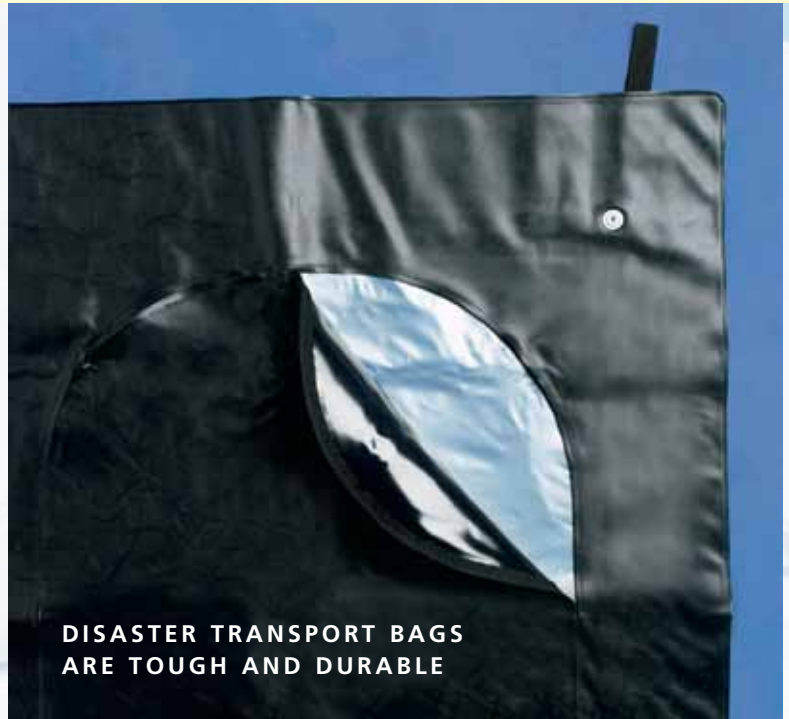

- The C-style zipper curves along the top of the bag, rather than on the sides, for more secure containment of body fluids
- Bag opens fully for easy loading
- Contains liquids with minimal risk of leakage
- All outer seams on the bag are heat sealed for added strength
- Available configurations:
 - 18" x 24" Infant, PVC
 - 30" x 48" Pediatric, PVC
 - 36" x 90" Adult, PVC
 - 40" x 96" Adult XL, PEVA
 - 72" x 90" Adult XXL (bariatric), PVC

Straight Center Zipper Bag

- The straight style zipper opens on the top center and runs the full length of the bag
- Design features no side seams; top and bottom seams are heat sealed for added strength
- Contains liquids with minimal risk of leakage
- Available only in chlorine-free PEVA
- Available sizes:
 - 24" x 36" Infant/Pediatric
 - 40" x 96" Adult XL

Disaster Transport Bag

- 36" x 88" Disaster Transport Bag is constructed of durable 20 mil laminate with six strong side handles for easy transport and outer seams are heat sealed for added protection

Shroud Packs

- Over 70 stock kits to choose from, or kits may be customized at no extra cost
- Custom Kits are tailored to your needs with component choices including:
 - Chin Straps
 - Cellulose Pads
 - Ties
 - Identification Tags
 - Universal Precautions Labels
 - Personal Effects Bags
 - Customized instruction sheets
