TIME SAVINGS

HELP INCREASE SITE SECURITY AND LONGEVITY

with customized IV Securement Kits

Innovative Centurion products to improve site integrity

Offer your patients superior site protection for up to 7 days! IV Securement Kits by Centurion set the standard in site securement. Kits are customized to include only the components you choose, featuring innovative products designed by IV nurses.

CENTURION IV SECUREMENT KITS
FEATURE PRODUCTS THAT HELP:

- Provide a superior alternative to standard peripheral dressings and tape
- Increase patient comfort by reducing or eliminating additional needle sticks
- Eliminate pistoning and rotating of the catheter in the vein which causes mechanical phlebitis
- Prevent or eliminate unscheduled re-starts... resulting in greater patient comfort and time savings for nurses
- Contain costs and promote standardized procedures through consistent product usage

SORBAVIEW AND VERSADERM DRESSINGS

Provide a proven barrier against contaminants, while allowing the skin to breathe freely

Protect the site for up to 7 days

Easy to apply and stay securely in place

Featuring strong adhesive that keeps dressing intact while gentle and non-irritating to skin

HUBGUARD ADHESIVE FOAM CUSHIONS

Adhesive-backed foam securely anchors catheters in place to provide comfort while enhancing stability

Reduces "pistoning" of catheter in vein

Increases patient comfort by significantly decreasing the risk of skin irritation under the hub

LINEGUARD J-LOOP SECUREMENT DEVICE

Anchors IV tubing to prevent movement at site caused by accidental tugging

Helps standardize protocols for J-loop procedures

EXTENSION SETS

Customized to include the valve of your choice, along with many other options

Help direct tension away from the insertion site

ADDITIONAL KIT COMPONENTS

"Slip-free," latex-free tourniquet

CHG-based ChloroPrep and other prep solutions

Tape rolls and pre-cut strips

Linen Saver Drapes, gauze, gloves and other items available
