# THE CENTURION<sup>®</sup> PERIPHERAL SECURITY SYSTEM

As Easy As 1, 2, 3!

## 1. stabilizes the catheter

- Patient-friendly foam cushions against hubs and external forces
- Securely anchors catheter at insertion site
- Enhances stability to reduce pistoning of catheter in vein

## 2. secures the extension set

- Fastens IV tubing to soft, comfortable pad
- Prohibits catheter movement in the vein when extension set is manipulated, tugged or bumped
- Helps standardize protocols for J-loops

## 3. protects the patient

- Provides proven bacterial barrier
- Can stay on for days while remaining comfortable for patient
- Allows for continual site monitoring

### 1. stabilizes the catheter

### 2. secures the extension set

### 3. protects the patient

## Security System Advantages

- Simple application and easy removal
- Standardizes procedures – takes the guesswork out of application and removal
- Saves time and money
- Preserves the integrity of the site
- Soft, pliable materials conform well to body contours and stretch with skin movement
- Non-sensitizing, non-irritating and latex free
- Meets INS Standards for Catheter Stabilization
- Also available with absorbent window dressing
