CENTURION®

RADIOLOGY TRAYS

PROCEDURES

We can help you customize these trays to meet the needs of various radiology procedures, including:

- PICC line insertion
- breast biopsy
- general biopsy
- general / universal procedure
- universal central line insertion
- angiogram
- arthrogram
- lumbar puncture
- myelogram

There are many advantages to utilizing custom radiology kits. First, kits encourage consistent protocols and product usage. And since they're customized to meet your facility's specific criteria, you have exactly what you need and nothing is wasted. Plus, because they're pre-packed and ready to go, they help streamline set-ups and increase efficiency; saving valuable time!

There are many components available to customize your tray, including:

INSTRUMENTS

- Safety scalpels to help prevent injury
- Patented SnagFree® needle holders for smooth suturing
- Tissue forceps
- Hemostats
- Scissors
- Full selection of other instruments available

INFECTION CONTROL

- CHG applicators, povidone-iodine and other prep solutions
- Many drapes available – including full body drapes for head to toe coverage – many with fenestrations and adhesive incise areas
- Impervious gowns with cloth cuffs, caps, face masks, gloves... all offer clinician protection
- SilverSite™ Antimicrobial Site Dressing delivers patented antimicrobial protection to the insertion site for up to seven days

STERILE LABELS

- Centurion® Sterile Labels enable proper medication labeling
- Complies with latest JCAHO requirements for medication labeling

DRESSINGS

- SorbaView® Window Dressings offer superior adherence and patient comfort
- HubGuard™ and LineGuard™ enhance catheter stability and securement
- WingGuard™ PICC Securement Device provides adhesive-based securement that eliminates need for sutures
- Towels, gauze, bandages and tape strips

PAIN MANAGEMENT

- Lidocaine, Heparin, Sodium Chloride
- Needles: spinal needles, needles with filters, safety needles
- Syringes, basins
