

CENTURION®

Cool Peri-Pad

Offering Superior Postpartum Protection and Comfort

- Reduces swelling
- Sustains temperature for up to 40 minutes
- Large sized pad decreases number of pad and linen changes
- Combination of cold and padding greatly increases patient comfort (softer than gloves filled with ice!)
- Easy to activate – just twist!
- No freezing or refrigeration required
- Full length adhesive strips eliminate need for belts

A cold pack is a cold pack... unless it's the Centurion® Cool Peri-Pad! Why? For starters, we made it highly absorbent – much more than any other product on the market. And fewer pad changes means less discomfort for your patients. Then, we made the built-in inner ice pack larger, to cover more area and provide more relief. No more running to the ice machine to fill a glove or baggie with ice! Best of all, it's from Centurion Medical Products, so you know it's a name you can count on for the best quality and the best service.

Also available: The Centurion® Warm Peri-Pad for patients who need heat therapy
