VersaDerm® Dressings help control costs.

VERSATILE.

Designed for:

- Peripheral sites
- Dialysis procedures
- Oncology administrations

STAYS SECURE.

- Strong adhesive keeps dressing intact
- Low-trauma removal leaves virtually no residue behind

EASY TO APPLY.

- Simple-to-use, first-aid style application
- Results in fewer wasted dressings when compared to frame-style transparent film applications

LONG WEARING.

- Designed to replicate skin's natural system of respiration
- Allows for continuous site observation without removal of dressing
- May be worn for extended periods of time with a low risk of skin irritation or increased accumulation of moisture
- Provides proven viral and bacterial barrier

COMFORTABLE FOR PATIENTS.

- Conforms well to body contours and stretches with skin movement
- Can be worn while bathing
- Non-irritating, non-sensitizing, non-cytotoxic
- Latex free

REDUCES COSTS.

- Fewer dressing changes leads to significant savings for hospitals
